

15-hour a week Student Job in Quantitative Data Analytics

Competitive salary, an international environment, 8 meter ceiling and free coffee...

We run a DKK 1bn+ business trading construction materials primarily to the professional market. We are expanding our Data Analytics team to help automate electronic trading of our processes.

Your tasks will be to help develop tools for automating our B2B business by using internal and external data for:

- Automated Price-setting
- Transport & packing algorithms
- Business Analytics & Reporting

We expect you to have a passion for working with data and numbers

- You hold a BSc (or are close to finishing it) and are continuing your MSc or PhD in a quantitative subject such as physics, statistics, maths, econ or similar.
- You are among the top of your class.
- You have knowledge of R, Java or Python and are interested in learning more.
- You can work independently, and as part of a team.
- You have at least 2 years of study left.
- You speak English. Knowledge of a Scandinavian or northern European language is an advantage but not required.

We offer an exciting job within our Data Analytics Team in Aarhus Syd:

We pride ourselves with

- 1:1 mentoring
- Very high standards and work ethics
- Excellent opportunities for personal development
- An international environment with people from diverse backgrounds
- Flexible working hours which can be distributed so they fit into your schedule. 15 hours pr. Week.
